Landrum Performance Springs': Tuning Guide for Circle Track

Drivers have different styles and technics, so the set-up that any given driver likes may feel awful to you. If the set-up feels uncomfortable to you, then chances are it will not be the fastest set-up for you. You should always have option springs to experiment with to find your base line set-up and to adapt to changing track conditions. Then you can always fine tune your set-up with different shock packages, sway bars, etc. Always start tuning by concentrating on the first part of the turn/ corner entry. Always break the corner up in three parts, Corner Entry, Corner Center and Corner Exit. Below are some tips that will help you dial your car in and go straight to victory lane.

To Tighten:				
Corner Entry		Center		Exit Corner
Throttle On	Throttle Off	Throttle On	Throttle Off	Throttle On
Soften RR Spring	Soften LR Spring Stiffen LF Spring	Stiffen LF Spring Soften RF Spring	Soften RR Spring Stiffen LR Spring	Soften RR Spring Stiffen LR Spring

To Loosen:				
Corner Entry		Center		Exit Corner
Throttle On	Throttle Off	Throttle On	Throttle Off	Throttle On
Soften LR Spring Stiffen RR Spring	Stiffen RF Spring Stiffen LF Spring	Soften LR Spring	Soften RF Spring	Stiffen RR Spring
